Education

York University, Toronto, Canada

Computer Science
Bachelors of Science (BSc)

Frontend Developer Bootcamp

Frontend Simplified

May 2022 – Sep 2022

Experience

Frontend Developer Internship

Frontend Simplified

Sep 2022 - Nov 2022

- Transformed a completely static HTML, CSS, JavaScript and React single page application into an interactive user interface using animations, transitions and carousels
- Processed API requests with Axios to dynamically represent data from a cloud server and represented it through skeleton loading states, pagination and dynamic routing
- Utilized Git version control and the GitHub interface to work and thrive in a virtual and collaborative team environment

Freelance Frontend Developer

Self Employed

Oct 2022 - Current

- Delivered 2 professional websites using HTML5, CSS3 (+ SCSS, BEM), JavaScript and React best practises
- Improved website performance by compressing, caching and lazy loading images and components
- Included SEO, responsive, multi-platform and hosting support, enabling their website to be used by any browser or device in the world

Projects

NFT Marketplace | [Website](#) | [GitHub](#)

- Single page React application with animations, transitions and carousels.
- Fetches data using Axios, with a filter system and represented using skeleton loading states, pagination and dynamic routing.
- Utilized Git version control to push code to GitHub, using Pull Requests, Git merge and GitHub branches.

Ecommerce Website | [Website](#) | [GitHub](#)

- Ecommerce website made using React, fetching dynamic data from a database.
- Integrated user authentication using Firebase Authentication. In addition, used Firebase Firestore to store user carts when users are logged in.
- Created a fully responsive ecommerce website using React best practices, Firebase, Context API.

Gmail Clone | [Website](#) | [GitHub](#)

- Implemented local emailing functionality using Firebase Firestore database.
- Integrated Google Sign-in user authentication using Firebase Authentication and React Redux to display a user's profile picture in the application.
- Created a fully responsive Gmail Clone with React, Redux, Javascript, HTML and CSS best practices.
